### PROFILE

I am a highly skilled and motivated full-stack developer seeking to utilize my expertise in front-end and back-end technologies to contribute to innovative projects. With a strong background in web development and a passion for creating efficient and user-friendly applications, I am eager to collaborate with a dynamic team to drive success and exceed expectations.

### WORK EXPERIENCE

- Joy E Bike** 2023 - PRESENT  
Full Stack Developer
  - Spearheaded the development of a vehicle tracking system using JavaScript, React.js, Node.js, and SQL Server.
  - Managed full project lifecycle from requirement analysis to deployment, significantly enhancing system performance and business operations.
  - Created RESTful APIs using Node.js with Express framework for data manipulation.

### PROJECTS

- Vehicle Tracking System**
  - Technologies Used: Node.js, React.js, SQL Server
  - Description: Developed a comprehensive vehicle tracking system designed to provide real-time location updates and analytical insights to optimize fleet management. Implemented both the backend and frontend functionalities, creating a seamless user interface and robust data processing backend.
  - Achievements: Successfully integrated live GPS data with SQL Server to handle and analyze large datasets efficiently, which enabled the company to reduce operational costs and improve vehicle utilization.
- Freelancing Website**
  - Developed a comprehensive platform for freelancers to connect with potential clients. The project involved full-stack development, including front-end, back-end, database management, and cloud services deployment.
  - Engineered using best practices in responsive design and security, enhancing user experience and safeguarding user data.
  - Utilized a combination of modern technologies to ensure robust performance and scalability.
